EDUCATION

University of Northern Iowa

Cedar Falls, IA | Anticipated May 2027

BA Computer Science

Iowa State University

Ames, IA | 2018 - 2022

BA Computer Science

SKILLS

Coding Languages: JavaScript, Java, HTML, CSS,
Python, SQL, Mongo, JSON, Typescript, EJS, DTL

Database: PostgreSQL, MongoDB

Libraries and Frameworks: React, Express.js, Django,
Jquery, Bootstrap

Other: RESTful Routing, JSON api

RELEVANT SOFTWARE EXPERIENCE

General Assembly Remote | Software Engineering Immersive

March 2023 - June 2023

- Completed an intensive 24-week, 450+ hour full-stack software engineering program focused on product development, object-oriented programming, MVC frameworks, data modeling, and collaborative development practices.
- Built a portfolio of individual and team-based projects demonstrating full-stack application design and deployment

Cryptid Seeker | MERN Stack | <https://github.com/MendersGame/front-end-cryptid-seeker> **March 2023 - Present**

- Designed a full-stack application that enables users to securely journal and share personal cryptid experiences, supporting community interaction and collaboration.
- Developed the platform using the MERN stack (MongoDB, Express, React.js, Node.js) within a two-day sprint, implementing complete CRUD functionality through RESTful API endpoints.
- Built the interface with a mobile-first approach and implemented responsive styling using Styled-Components, CSS3, and Flexbox to enhance usability across devices.

Battleship Coldwar | GitHub: <https://github.com/nicklohmanna/Battleship-Cold-War>

March 2023 - Present

- Developed a Cold War-themed adaptation of the classic Battleship game, featuring interactive gameplay and strategic mechanics
- Built core game functionality exclusively with JavaScript to manage logic, user interactions, and game state
- Designed a clean, intuitive game interface using HTML and CSS best practices to deliver a clear and engaging user experience

Bulls Blog | MEN Stack | GitHub: <https://github.com/nicklohmanna/bulls-blog>

March 2023 - Present

- Developed a blog-style web application for Chicago Bulls fans to share discussions, opinions, and community-driven content.
- Integrated RESTful API calls to an Express, MongoDB, and Node.js backend to support full CRUD functionality, and validated backend routes using Postman throughout development.
- Utilized Mongoose to design and manage MongoDB data models and schemas.
- Implemented responsive UI styling using Styled-Components, ES6 tagged template literals, CSS3, and Flexbox to create a clean and user-friendly layout.
